Storage

Fursys Education's new laboratory system will provide you with an effective space for excellent research and results.

You can store numerous laboratory equipment systematically in this state of the art research space and customize it to your research needs. Hold discussions with your colleagues in this creative laboratory to produce optimal results.

Achieve all this with Fursys Education Laboratory System.

Details

Upper cable space
Power outlets and LAN ports can be installed as required above work top, for convenient use of electronic devices and internet.

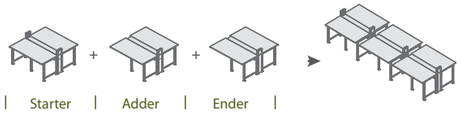
Lower cable space
Use to connect analytical equipment and other devices that do not need to be moved.

Magnetic catcher end tile
Detachable magnetic catcher tile for re-arrangement of cables or for convenient use in the case that additional power cables are installed.

Extendable endless type laboratory table

Fursys Education laboratory table is an endless system that is composed of 3 standard units – starter, adder, ender. These units can be added as required to extend the workspace. The more endless units you add, the more economical it is when compared to individual units.

※Note that adder and ender type laboratory tables cannot be used independently.



Shelf type

※Width 1800 table is installed support legs.
Width 1200&1500 table are not installed support legs.

The sink is used for both water and chemical substances. Highly chemically resistant sink bowls, a glass protector that prevents water spillage, an emergency eye washer to rinse eyes. These functions come together to enhance safety.

Details

Glass protector

A simple, stylish glass protector to prevent water from spilling over sink area.

Polypropylene sink bowl

Polypropylene, which is high in chemical resistance, has been used for sink bowls to rinse experiment equipment safely.

Emergency eye washer

Eye washer can be installed for fast rinsing of eyes when contact is made with chemicals.

Tap selection

Standard tap or chemical tap can be selected according to experiment type and usage.

Details

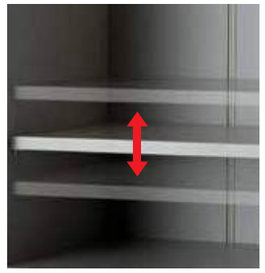
Fursys Education bottom storage units comes in 3 types –cabinet, 3–story drawers, combination storage unit. They help maximize efficiency of space below the laboratory table. Choose item according to size of space and usage.

Lower drawer cabinet

Embedded handle design
Embedded handles enhance simple look.

Caster
Cabinet comes with casters on bottom for easy transportation. Can be placed according to space requirements.



Portable shelf
Portable, convenient shelf that allows storage of experiment devices and items of various sizes.

Combination storage cabinet / 3-story drawers

Drawer divider
Divider installed inside drawer for efficient storage of small chemicals and experiment tools.

Varied layouts
Drawer cabinet, door cabinet, combination cabinet can be selected and combined according to user needs.

Embedded handle design
Embedded handles enhance simple look.

Laboratory for Student

Table
Sink
Storage

Science experiments help students to see with their own eyes the information they have read in textbooks. However, students move around actively and need to handle dangerous chemical substances and equipment, making safety most important.

Fursys Education's laboratory system is sturdy and provides the best conditions for experimentation.
It creates a safe experiment space where students can participate while having fun.

What is Chemsurf?

Chemsurf is a chemical resistant material that is used in hospitals, schools and laboratories. It is resistant to over 100 chemicals and is scratch-resistant. It prevents the growth of bacteria, staphylococcus, streptokinase, colon bacillus and pneumococcus (acquisition of ASTM G-22, American Laboratory Experiment Association).

Details

Laboratory workstations for teachers

Chemsurf
(Chemical resistant HPM)

Fursys Education laboratory products, including workstation, sink and side cabinet, are coated with chemical resistant HPM to prevent discoloration and damage despite continued exposure to chemicals.

Wire management

Flexible cable cap is attached to the workstation surface and side cabinet, for ease of monitor use and PC connection.

Power tool-kit

Front of laboratory workstation is equipped with a 4-hole multi-tab for easy connection of electrical devices.

Drawers (Pen tray included)

Inside of drawers is equipped with a full-extension rail, allowing for maximum use of drawer space. A shelf is attached to the rear of drawers for additional storage.

Portable laboratory table

Casters

Laboratory table with casters enables teachers to move around the class, to maximize student participation.
Casters are made of urethane for silent, smooth transportation.

Wall unit laboratory table

Chemsurf
(Chemical resistant HPM)

Fursys Education laboratory products, including workstation, sink and side cabinet, are coated with chemical resistant HPM to prevent discoloration and damage despite continued exposure to chemicals.

Handle

Elegant, metallic aluminum-die casting handles are built in for safety.

Storage space

Open shelves on the lower side of table provide additional storage space.

What is Chemsurf?

Chemsurf is a chemical resistant material that is used in hospitals, schools and laboratories. It is resistant to over 100 chemicals and is scratch-resistant. It prevents the growth of bacteria, staphylococcus, streptokinase, colon bacillus and pneumococcus (acquisition of ASTM G-22, American Laboratory Experiment Association).

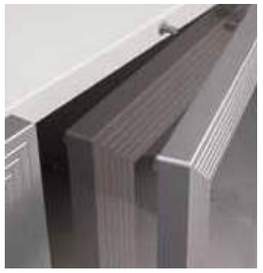
Fursys Education cabinet comes in a wide range, for a variety of uses and layouts. All products come with One-Key System locking device for safety and user convenience.

Details



Soft closing door

Soft Closing Door prevents damage of stored items and reduces noise.

One key system

Convenient locking system with a single key operates all locking devices, including cabinet and drawers. The flexi-key is specially designed to turn smoothly, protecting both the user and stored equipment.

※ Separate order required (notify quantity needed).

Aluminum frame door

Metallic aluminum frame glass door is highly durable and eye-pleasing.
